

Integrated Planning Model for Amalgamated Councils

Following the 2008 Queensland Council amalgamation, consulting companies Leisure Futures and CPR Group combined expertise in the development of a cost efficient process to assist newly amalgamated Councils to consolidate and prioritise their open space, sports and recreation facilities and development plans and needs.

Our planning and development model focuses on a prioritised approach to facilities and Club/Organisational development at a local and regional level. Underpinned by face to face consultation with Council and key stakeholders the integrated planning process greatly assists Council in establishing a politically, financially and community endorsed Sport – Recreation and Open Space Development Plan.

Key aspects of our planning process include:

- Situational Analysis
- Consultation
- Gap Analysis
- Needs Analysis
- Capital Cost Analysis
- Prioritised Implementation Plan

Delivered for an average cost of between \$10,000 and \$15,000 and with a completion time of eight weeks, our integrated Recreation and Open Space Development Plan can be tailored to a 5 year, 10 year or 20 year plus time horizon. The consultants are members of various panels of pre-qualified suppliers for the provision of sport and recreation planning services to local government in Queensland, including LGAQ's *LocalBuy*
